

Illinois Home Weatherization Assistance Program

The Home Weatherization Program is designed to aid income eligible residents by making their homes more energy efficient, thereby reducing their energy costs and improving living conditions. This is done by adding attic, sidewall and floor insulation, proper venting for attic and crawl spaces, caulking, weather-stripping, broken glass replacements, storm windows, doors, water heater jackets and window replacement, when approved by Illinois Home Audit. To be eligible for this program you have to

show proof of income for the past 12 months, proof of home ownership (home ownership or landlord) and a fuel bill in applicants name at time of application. Funding for this program is from the Illinois Department of Energy, Department of Health & Human Services, and is administered by Illinois Department of Public Aid.

ERBA also offers furnace repair and/or replacement, as is deemed necessary for proper safety of the client. Smoke detectors and carbon monoxide detectors are also offered as safety equipment. Ventilation is also checked on all gas combustion appliances and repairs made when necessary. In extreme cases water heaters may be replaced when there is a safety hazard.

Jasper County Outreach Office
904 West Jourdan
